Education

North Carolina State University, *Raleigh, NC*
Master of Computer Science   Aug 2024 - May 2026
Relevant Coursework: Software Engineering, Artificial Intelligence 1, Advanced Robotics, Neural Networks
GPA: 4.0/4.0
SASTRA Deemed University, *Thanjavur, India*
Bachelor of Technology in Computer Science and Engineering   July 2018 - July 2022
Dean's list: Top 10% 2019 - 2020, Top 2% 2018 - 2019
GPA: 9.22/10.0

Skills

Technologies:	C++, Python, JavaScript, TypeScript, Java, Bash, Go, React, Node.js, Flask, Django, HTML, CSS, Git
Databases:	NoSQL, SQL, GraphQL, MySQL, MongoDB, PostgreSQL
Frameworks / Libraries:	Mongoose, Express, Tailwind, Angular, Next.js, FastAPI, OpenCV, Recharts, TensorFlow, PyTorch
Tools:	GitHub, GitLab, Docker, OpenAI API, Postman, Nginx, GCP, AWS, Azure, Ollama, Visual Studio Code

Work Experience

Grader, Advanced Robotics, North Carolina State University*, Raleigh, USA*   Jan 2025 - May 2025
- Modeled Triton bots with ROS, contributing to creating schematics for 10 bots deployed in final student projects.
- Designed a workflow with **LINUX** shell scripting to cut down the software setup of each bot by 60%.

Associate Technical Consultant, **Salesforce**, Inc., *Bengaluru, India*   Aug 2022 - July 2024
- Optimized and extended API integration and ETL pipelines in Java for retrieving CIBIL scores, increasing processing capacity by 90%.
- Spearheaded a Go-Live initiative to integrate the Salesforce customer application with a **React Native** app, driving a 20% increase in multi-platform user adoption and enabling offline functionality.
- Engineered a robust database object creation system leveraging **RESTful API** payloads from custom React Native App, improving data processing speed by 50%.
- Optimized **Azure CI/CD** pipeline with a **GIT** script, cutting deployment time by 40% through selective package deployments.
- Automated the creation of 40 Salesforce workflows and metadata files using Go and Regex, reducing manual effort by 67%.

Associate Technical Consultant, Intern, **Salesforce**, Inc., *Bengaluru, India*   Feb 2022 - Aug 2022
- Developed a comprehensive web portal with **ReactJS** for over 50 million Fintech bank customers, streamlining online KYC processes to enhance user experience and ensure 100% regulatory compliance.
- Implemented automated test scripts using Python and JUnit to validate API functionalities, increasing test coverage by 70%.

Research Assistant, Intelligent Systems Group, *SASTRA Deemed University, India*   Feb 2021 - Feb 2022
- Created novel models using TensorFlow in Python for video anomaly detection, achieving a 94% AUC score on the UCSD Ped 2 dataset.

Projects

Web development | Website Link | GitHub Link**:** Created a full-stack web application that collects and predicts trajectories of weather balloons using **React** frontend, CesiumJS, Flask Backend, SQLite Database, and Nginx reverse proxy server that handles traffic requests to an AWS EC2 instance.

Web development | GitHub Link: Designed and implemented a scalable, full-stack recipe application (React, FastAPI, MongoDB) to enable efficient recipe management; included a Groq-integrated AI assistant, resulting in a more user-friendly platform.

Computer Vision/AI-ML | GitHub Link**:** Enhanced text clarity in live video using OpenCV and YOLO in Python; integrated solution into Android video streaming app for **Google Solution Challenge 2021**.

Publications

Computer Vision
- "Object-centric and memory-guided network-based normality modeling for video anomaly detection", SIVP: Boosted model performance by 50% and AUC scores by 1%.
- "Residual Spatiotemporal Autoencoder with Skip Connected and Memory Guided Network for Detecting Video Anomalies", NPL: Enhanced AUC by 3% on LV dataset via spatiotemporal autoencoder fusion.

Extracurricular

Interests:	Soccer, Weight training, Video games.
